SEO Performance Report

digitalx-solutions.com | Google Search Console (15 Feb to 20 Oct 2026) and Bing Webmaster Tools (29 Jun to 19 Oct 2026)

Prepared from your exports dated 23 Oct 2026

3/10

overall rating

Search performance today. Indexed and technically fair, but largely invisible. Average position is 32.7, and the US and Australia produced just 31 clicks in eight months.

Headline numbers

Metric	Google	Bing
Clicks	145	7
Impressions	7,527	144
Click-through rate	1.93%	4.86%
Average position	32.7	not in the Bing export
URLs with impressions	62	not in the Bing export
Days with impressions	232 of 248	46 of 113

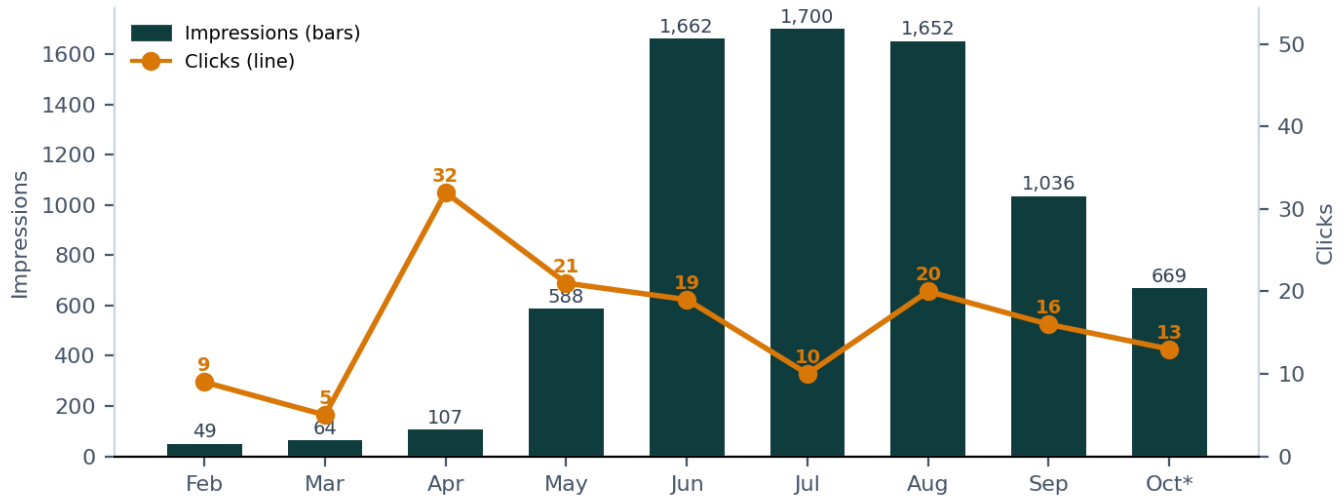

Scorecard

Area	Score	Evidence
Indexing	6/10	62 URLs earn impressions. Only 2 of 7 posts and 32 of 50 industry pages appear.
Rankings	2/10	83.5% of impressions from visible queries sit at position 21 or lower.
Click performance	2/10	1.93% CTR overall and 0.65% in the US and Australia.
Brand strength	3/10	The exact name ranks 1st to 2nd, but generic 'digitalx' and 'digital x' rank 32 to 36.
Content coverage	3/10	The industry pages that appear earned 273 impressions and 4 clicks in total.
Bing	1/10	7 clicks and 144 impressions in 16 weeks.
Technical foundation	6/10	Canonicals, robots tags and mobile tags are in place (outside-in audit of 8 pages).

Key takeaways

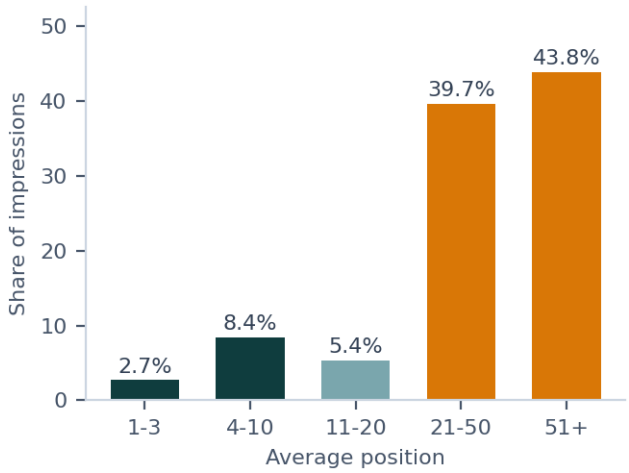

- The homepage earns about 77% of clicks. No other page has more than 10.
- The US and Australia account for 4,735 impressions (62.9% of the total) but only 31 clicks. Average positions are 26.7 (US) and 54.6 (Australia).
- Pakistan gives 42.1% of clicks from 3.9% of impressions at position 4.2. That is most likely you, your team and local brand searches, so exclude it when judging progress.
- Non-brand search: 321 visible queries, 2,382 impressions, 3 clicks.
- Closest wins: the missed-call text back page (position 22), the /usa and /au click-through rates, and the server-side tracking article (positions 22 to 25).

Trend and ranking position

Monthly Google impressions and clicks. *October covers 1 to 20 October only.

Impressions grew from 588 in May to about 1,700 a month from June to August, then fell to 1,036 in September and about 1,000 a month in October. Clicks stayed between 10 and 21 a month, so the growth in impressions never turned into traffic. Last 28 days against the 28 before: impressions 901 vs 1,144 (-21%), clicks 20 vs 16 (+25%).

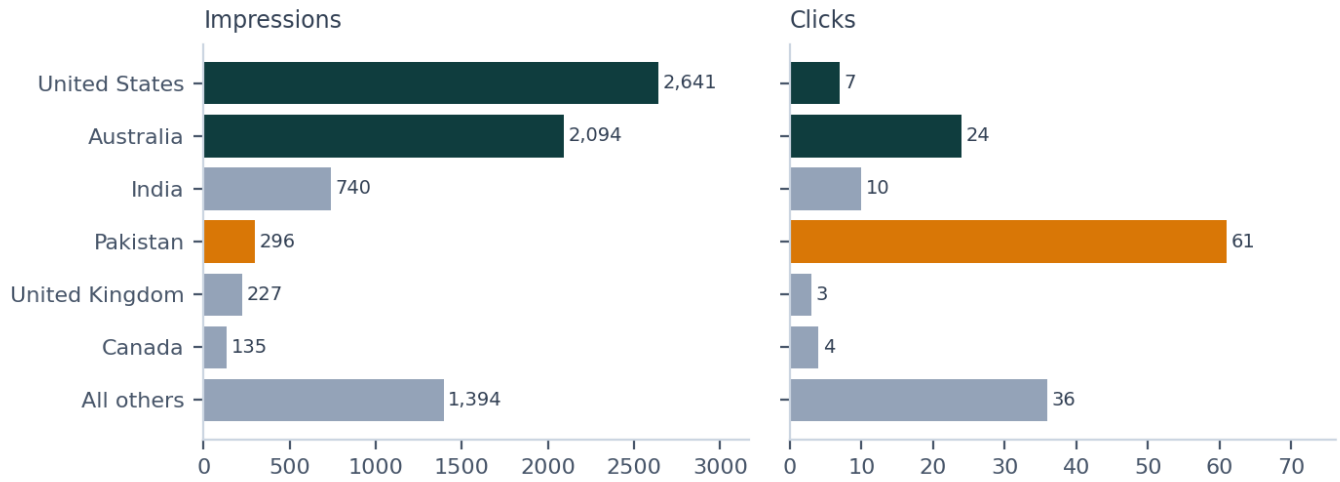

Where your impressions sit

Only 2.7% of impressions from visible queries are in the top 3, and 8.4% at positions 4 to 10. **83.5% are at position 21 or lower**, which is page 3 and beyond.

Position 11 to 20 holds only 5.4%, so there is almost no near-miss traffic to rescue by tweaking titles. Growth has to come from new and deeper content and from authority.

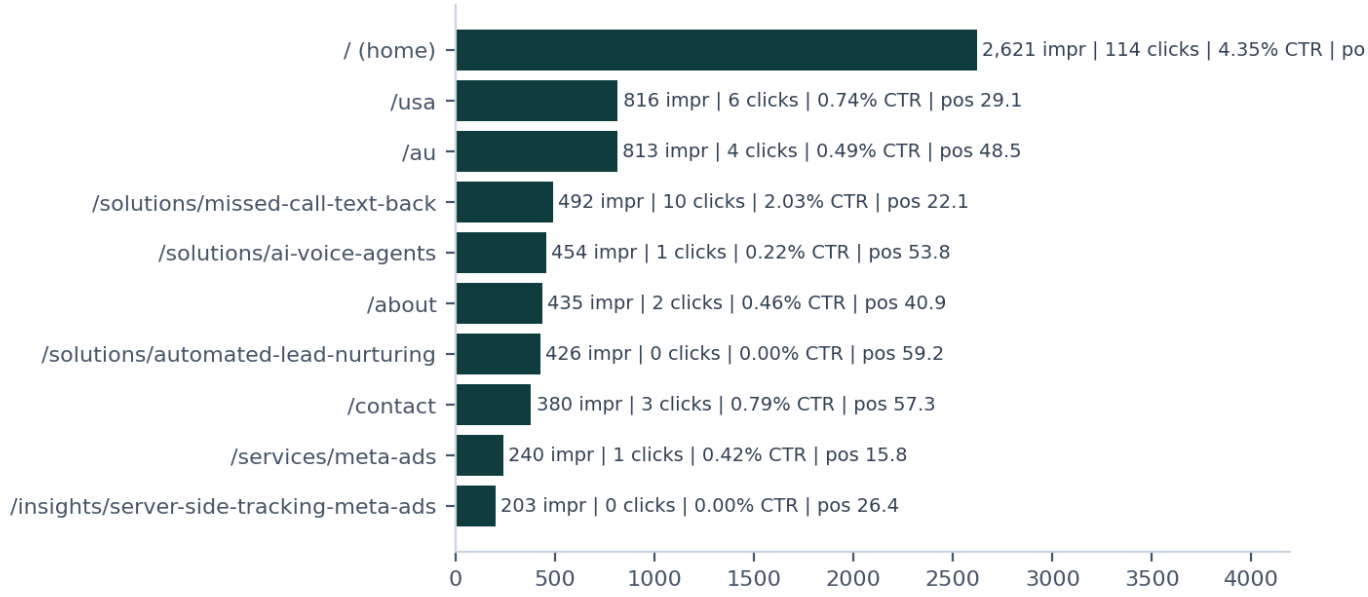

Based on the 364 queries in the export, which cover 12.4% of clicks and 45.5% of impressions.

Markets and pages

Impressions and clicks by country. Teal marks your target markets, amber marks Pakistan.

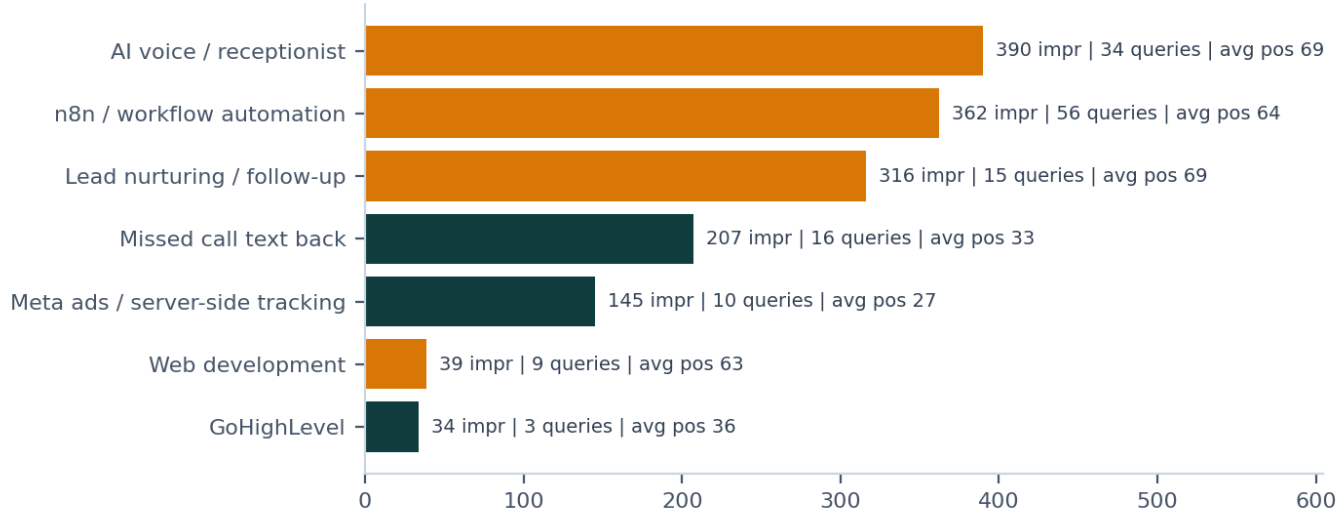

The US and Australia produce 62.9% of impressions but only a 0.65% click-through rate, because you rank at 26.7 (US) and 54.6 (Australia). Pakistan, at position 4.2, is almost certainly inflated by your own searches. In Search Console, add a country filter that excludes Pakistan before judging progress.

Top 10 pages by impressions.

The biggest gaps between impressions and clicks are /usa (816 impressions, 0.74% CTR), /au (813, 0.49%), /solutions/ai-voice-agents (454, 0.22%) and /solutions/automated-lead-nurturing (426, 0%). Desktop shows 6,207 impressions at position 36.1; mobile shows 1,302 at 16.9.

Topics and content coverage

Non-brand queries grouped by topic (each query counted once). Teal means average position of 40 or better.

Topic cluster	Queries	Impressions	Clicks	Avg position
AI voice / receptionist	34	390	0	69
n8n / workflow automation	56	362	0	64
Lead nurturing / follow-up	15	316	0	69
Missed call text back	16	207	2	33
Meta ads / server-side tracking	10	145	0	27
Web development	9	39	0	63
GoHighLevel	3	34	0	36

Coverage check

Content	Status	Evidence
Blog posts	2 of 7 appear	Only the GoHighLevel setup (Australia) and server-side tracking posts earn impressions. The four June 2026 AI receptionist and missed-call posts earn none.
Industry playbooks	32 of 50 appear	273 impressions and 4 clicks in total.
Solution pages	6 of 8 appear	No impressions for /solutions/gohighlevel-implementation or /solutions/chatbots.
Demo projects (/development)	5 pages appear	296 impressions and 1 click, mostly for project names such as FinTrend.

Brand and hidden queries

Query type	Queries	Clicks	Impressions
Brand (contains 'digital x')	43	15	1,043
Non-brand	321	3	2,382

Google hides rare queries, so 87.6% of clicks and 54.5% of impressions come from queries that are not in the export. Use the Pages report for decisions.

Action plan, in priority order

#	Action	Why (from your data)	When
1	Rewrite /solutions/missed-call-text-back (title, H1, meta, FAQ) and publish a 1,500+ word US and Australia guide. Link both from the homepage and every industry page.	492 impressions at position 22. The cluster averages position 33. 'missed call text back australia' is your only non-brand query with clicks.	Weeks 1-3
2	Retitle /usa and /au around intent plus place. Test one Brisbane page.	816 and 813 impressions at 0.74% and 0.49% CTR. 'ai voice agents brisbane' drew 126 impressions at position 79.	Weeks 1-2
3	Refresh the server-side tracking article: 1,500+ words, current examples, internal links.	'capi server side tracking' has 90 impressions at position 25 and 'meta server side tracking' 35 at position 22.	Week 2
4	Diagnose indexing in Search Console (Indexing, then Pages, plus URL Inspection) for the 5 missing posts and the 18 missing industry pages. Request indexing.	Only 2 of 7 posts and 32 of 50 industry pages appear.	Week 1
5	Build GoHighLevel visibility: a 'GoHighLevel agency Australia / USA' page with proof, plus fixes for /solutions/gohighlevel-implementation and /solutions/chatbots.	Only 3 visible GoHighLevel queries (34 impressions). Both pages have no impressions.	Weeks 3-6
6	Noindex the /development demo pages unless they sell your services. Deepen the top 12 industry pages (900+ words) and noindex the weakest until improved.	Demo pages: 296 impressions, 1 click. Industry pages: 273 impressions, 4 clicks.	Weeks 3-8
7	Strengthen the brand entity: Organization schema with sameAs, LinkedIn, Clutch, Crunchbase, consistent 'DigitalX Solutions' naming.	'digital x' and 'digitalx' show 774 impressions at positions 32 to 36, shared with other companies.	Weeks 2-6
8	Fix trust signals: named team, verified case studies, sources for statistics, illustrative examples labelled.	'riverstone dental group' shows your case study on page 1 (21 impressions at position 5.6).	Weeks 2-6
9	Bing: import from Search Console, submit the sitemap, turn on IndexNow, and export Queries and Pages next time.	144 impressions and 7 clicks in 16 weeks.	Week 1
10	Build authority: directory and partner listings, a missed-call revenue calculator as a link magnet, data-led PR.	Rankings are held back by authority and depth, not by indexing.	Months 2-3

Targets

Metric	Now	90-day target
Non-brand queries on page 1 (excluding brand and demo names)	0	3
/solutions/missed-call-text-back average position	22.1	under 15
Click-through rate in the US and Australia	0.65%	over 1.5%
Blog posts earning impressions	2 of 7	7 of 7
Bing impressions per month	about 20	100 or more

These are goals to steer by, not promises. Rankings depend on competition, content quality and authority.

Appendix and data notes

Top non-brand queries by impressions	Impr.	Clicks	Position
ai voice agents brisbane	126	0	78.8
lead generation & nurturing services	124	0	77.0
ylogx usa	105	0	23.4
fintrend	97	1	7.4
social media automation for painting contractors	91	0	56.4
capi server side tracking	90	0	25.4
digital cx solutions	81	0	88.8
digital solutions missed call	61	0	3.1
lead nurturing company	57	0	75.0
ai voice intake agent for mckinney tx practices	51	0	57.8
lead nurturing automation for professional services	50	0	71.6
digital workflow solutions adelaide	45	0	73.8
missed call text back australia	44	2	61.4
missed call text back software	41	0	43.4

Brand and look-alike queries	Impr.	Clicks	Position
digital x	390	0	32.6
digitalx	384	2	36.0
"digitalxweb.co.in" "digitalwebx"	46	0	10.8
digitalx solutions	44	5	2.2
digitalx jobs australia	31	0	11.8
digital x careers	22	0	8.8
digitalx company	20	0	53.7
digital x results	15	0	12.7

Queries such as 'ylogx usa', 'digital cx solutions' and 'xlmx digital solutionx' show people searching other companies with similar names. They add impressions but no demand for your services.

Data notes

- Search Console history starts on 15 Feb 2026, so Google has about eight months of data on the site.
- The Queries file covers only 12.4% of clicks and 45.5% of impressions because Google hides rare queries.
- The Bing file holds daily totals only, with no queries or pages. Export the Queries and Pages tabs next time.
- Desktop impressions (6,207 at position 36.1) far outnumber mobile (1,302 at 16.9), which is worth watching.
- The search appearance report is empty, so no rich results are showing for any page.
- The technical-foundation score comes from an outside-in audit of 8 pages, not from a Search Console crawl.
